

Security Door Locks

BENEFITS

To ensure a controlled access to the airplane, the operator can leave the airplane unattended and yet restrict its access. Each door providing entry to the cabin is either secured by a keylock accessible from the outside or locked from the inside. Security Features are used to lock the Passenger Door, the RH Service/Emergency Door and the RH & LH Overwing Emergency Exits, avionics Bay Door, Baggage Door(s) and Aft Equipment.

DESCRIPTION

Security Features are used to lock the Passenger Door, the RH Service/Emergency Door and the RH & LH Overwing Emergency Exits, avionics Bay Door, Baggage Door(s) and Aft Equipment.

APPLICABILITY

Bombardier Aircraft Model:

- CL600-2B19
- CL600-2C10

CERTIFICATION

- TRANSPORT CANADA STC #SA03-104
- FAA STC# ST01883NY

STC KIT CONTENTS

- Locking devices
- Warning flags
- Installation Drawing

WEIGHT

- Negligible impact
